TOKYO, JAPAN · npostius@gmail.com · linkedin.com/in/NPostius · nil.postiusgroup.com

Permanent Resident of Japan (永住者). No visa sponsorship required, no work category or hour restrictions. Citizenship: Andorra. Available at two weeks' notice.

INDUSTRIAL OPERATOR — BUSINESS BUILDING & PROGRAMME OWNERSHIP · ROBOTICS, APPLIED AI, OIL & GAS

Built a new industrial robotics and drone business inside a Japanese corporation from the business plan up: authored the plan that defined a sales path from \$0.44M in FY21 to \$140M in FY30, assembled a partner network of 6+ robot, drone and solution companies, and won the first Japanese orders – including a ¥20.2M PoC from TEPCO PG. Now holds end-to-end delivery accountability for an enterprise AI control programme for a Gulf national oil operator: roadmap, governance, KPIs, team and the customer relationship through execution. Works concurrently on buy-side analysis for US manufacturing acquisitions. MBA from GLOBIS University in Tokyo, and a Permanent Resident with six years inside Japanese corporations.

EXPERIENCE

AI Product Lead / Program Manager

JUN 2024 – PRESENT

Yokogawa Digital Corporation · Tokyo, Japan

- Own one enterprise AI programme end to end – an AI control model to reduce level fluctuation in separators for a UAE national oil & gas operator, covering plant identification, model design and the technical proposal.
- Accountable for roadmap, governance, KPIs, dashboards, onboarding and change management under the AIP5 transformation programme.
- Direct a cross-functional team spanning Japan, the UAE and Singapore.
- Built the AI Control Service / FKDPP enablement curriculum – service introduction, case studies, FAQ, sales lifecycle and roleplay content.

Business Development — Smart Manufacturing (DX, Robotics & Drones)

JUN 2020 – JUN 2024

Yokogawa Electric Corporation · Tokyo, Japan

- Authored the global robotics and drone business plan that created the business line – value proposition, entry wedge (industrial plant inspection robots), and a sales path from \$0.44M in FY21 to \$140M in FY30.
- Led MVP to commercialisation of the Robot Management Core – fleet management and data contextualisation – with developers in India, robotics engineers in Singapore and the US, and decision-makers in Japan, under C-level sponsorship.
- Built a partner network of 6+ companies: Boston Dynamics, ANYbotics, Mitsubishi Heavy Industries, ExRobotics, Taurob, SENSYN – including the business plans Boston Dynamics' top management required across Japan, SEA and the Middle East.
- Led the Petronas RaaS technical-evaluation PoC to a successful close; Petronas committed verbally to adopt the offering. Scoped the Stage 5 assessment: cybersecurity, integration, co-creation, support model, spare parts, logistics.
- Won Japanese enterprise business directly – a ¥20.2M robotics PoC order from TEPCO PG across 16 days and 7 sites, plus a related ¥3.7M order.
- Best Performance Award, Yokogawa Group 2024, for commercialisation of the RMC and PIA solutions.

Buy-side M&A analysis — US manufacturing acquisitions

PROJECT-BASED · CURRENT

For a Japanese manufacturing group · lower-middle-market US industrials

- Built the **equipment appraisal model**: manufacturing year, maintenance, usage and environmental factors resolved into effective age and failure risk, then into a defensible acquisition price.
- **Normalised earnings and owner-replacement analysis** – separating what the business earns from what the retiring owner was paying himself.
- Financing structures across **SBA 7(a)/504 loans**, **seller notes** and **real-estate-secured bank debt**, and the asset-versus-stock decision where OEM contracts must transfer intact.
- Maintain the deal tracker and the GO/NO-GO record across a multi-state pipeline of succession sales.

Targets, valuations and counterparties are confidential and deliberately omitted.

Digital Business Consultant CONCURRENT

DEC 2021 – PRESENT

JCE – Japan Creative Enterprise · Tokyo, Japan

- Defined the AI and IoT integration roadmap for a Singaporean SME entering the B2B2C asset-management market, with PowerApps/RPA workflow automation.

EARLIER

2018 · BARCELONA	Consulting Engineering Services – Volkswagen Group Services. Industrial automation projects; CAN and LIN integration with Siemens, Schneider and National Instruments.
2017 · MUNICH	Junior Consultant, Mechatronics – ITQ GmbH. Mechatronic showcase system for global industrial automation customer events.
2017 · ANDORRA	Renewable Energy Project Lead – delivered a 15 kW photovoltaic installation under Andorra's feed-in-tariff policy.
2016–17 · BARCELONA	Junior IT Project Engineer – ID Group, now Claranet. BI dashboards for predictive operations.
2015 · VICENZA	Assistant Project Manager – PROGETTI, ceramic & technical areas. HVAC electrical and mechanical installation design, energy-efficiency optimisation.

EDUCATION

MBA, Management – GLOBIS University Graduate School of Management, Tokyo. 2019–2020, MEXT Scholarship by embassy recommendation.

Executive Program, AI for Business – ESADE Business & Law School, Barcelona. 2020.

Master's & Bachelor's, Industrial Engineering – Ramon Llull University, Barcelona. Materials Science, 2011–2017.

LANGUAGES

Spanish – native · Catalan – native

English – business · French – conversational

Japanese – basic; business communication in English

CERTIFICATIONS

AWS Certified Cloud Practitioner · Certified ScrumMaster · Certified Scrum Product Owner · Machine Learning Specialization (DeepLearning.AI / Stanford) · Semantic Web Certification · Certified SOLIDWORKS Associate
